

Lockwood Donis Leadership

2022 Annual Report

Founder's Letter:

Thank you for being our friend and partner. Together we continue to resource leaders in twenty countries in the Americas and Africa! These leaders represent the cultural change that is possible when we foster awareness in the areas of values, culture shift, best practices, and social responsibility.

In April, we voted to change our organization's name to **Lockwood Donis Leadership** which more aptly describes the type of work we do and the change we seek in cooperation with affiliate communities. While philanthropy remains a priority, we believe that providing tools toward community resilience and self-reliance will produce the greatest return of social and financial resources in the long-term.

This year we again partnered with the John Maxwell Leadership Foundation to launch Country Transformation in Panama. Carolina trained 1,500 coaches who in turn provided values training for 15,000 public and private employees throughout the country to include the Ministry of Education. Carolina also provided continued oversight to the transformation movements in Guatemala, Costa Rica, Paraguay, and Dominican Republic whose participation is now over 4.2 million strong.

There remains much to do, and we remain committed to sharing positive values with leaders who in turn multiply the value in others. Thank you for joining us as we pursue leadership and cultural transformation together.

Yours in success,

David & Carolina
